

HOW TO HAVE A BETTER

We need to recycle all we can
bottles, paper and cans.

We can plant lots of seeds
and next have got some trees.

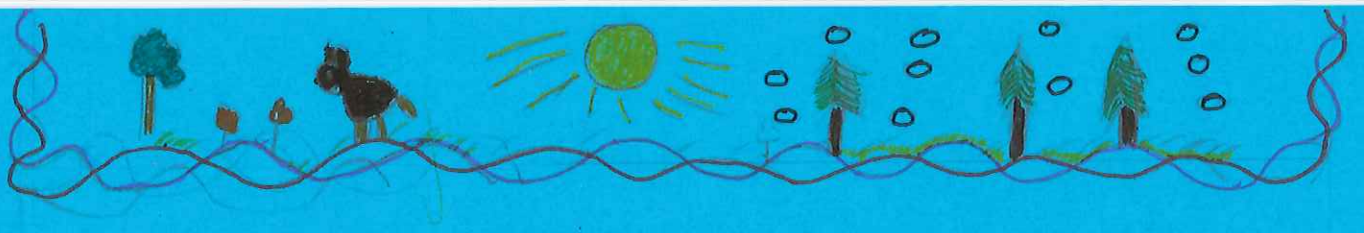

If we don't do anything
the animals will be dying
and the temperature
will be higher,
and the water,
will be polluted.

Dario i Jose.A.

WORLD?

BOTH SIDES OF THE EARTH

The water is sad, because we aren't environmental.

There are a lot of plastic in the Earth.
Observe and talk about this now!

Chinese, North American and people from all over the world
must change the energy for not having a nightmare.

Stop making nukes,
and the Earth gives thanks to you

If you want to help,
reduce, reuse and recycle.

Andreas J. and Jordi O.

SAVE THE WORLD

Today the planet is going to die.

But we can save it by doing these advices:

Don't use the car because you pollute the environment

Don't waste paper because the paper are trees

Switch off the things when you don't use them so you save the energy.

Don't waste water because the water finishes.

If you recycle, the planet will give thanks to you.

We should do every thing to help the planet.

We can make a new world, without pollution,

with more forests, more animals and more sunrises.

Alvaro Lopez Romero

Bauten Rubén García Muñoz

Take care of the Earth!

Three it's a magic number
we can reuse, reduce and recycle.

If we turn off the tap

we can save money and water.

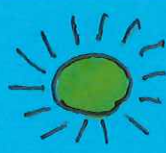

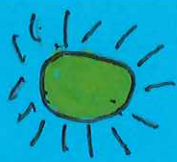

If you recycle you will shine and
the people to you are going to clap.

The world is a special place.

Take care of the Earth!

Annabel and Paula

SAVE THE WORLD

The Earth is falling down

and we don't make anything

we need the collaboration of everybody

then we will get it.

Save the sea, no more petroliferous accidents.

Maybe if there's another we couldn't do anything,

if you want to see a blue sea

help us and we will be in peace.

Save the air! No more pollution!

If you want to save lifes,

use other energies and solutions.

Don't use the car and The Earth will live more years.

If you follow these... we all live better. 😊

Not to pollute
helps to look after
the Nature.

If you waste water
the rivers and the oceans will get dried.

If you don't look after the
Nature all Earth will be
Polluted and all People
will have cancer.

~~Jose Luis~~
Pablo R

What are you doing with the planet?

If you pollute,
you are going to find terrible consequences

If you don't pollute,
you are going to live more years

If we go by bicycle,
We won't pollute the planet

It is also healthy
and so you do exercise

Come on, quickly
and help the Earth!

THE NATURAL POEM

 We need to recycle  

because we are killing the Earth

The oil isn't good for people, 

 and neither the tobacco.

 We draw the sky blue  

but the real color is grey.

 Tania and Marc

The Earth is Polluted

Every time there are
more things polluted

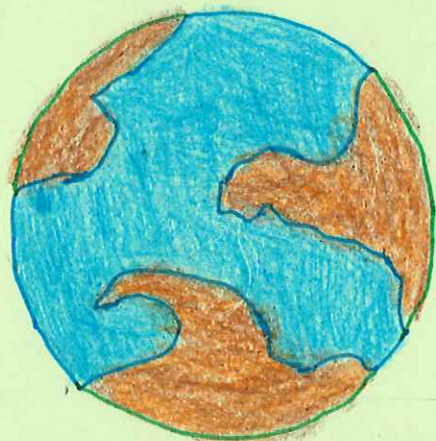

We have to look after
the environment

other wise the flora
and fauna will die

The more polluted places
are foreing countries

So, look after the planet!

Aroa Martínez
Carla García
ducia Bautista

POEM

The Earth is divided into two parts,
the pollution and purity.

The pollution includes everything
that damages living things.

The purity,
includes everything
that helps living things.

We will do a campaign
to help the environment.

The

Earth

The Earth is a treasure

We can't load it with so much pollution

We only have one opportunity

The nature is a present that

the Earth has given to us

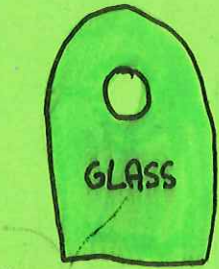

every year 5.000 babies die

because of the pollution

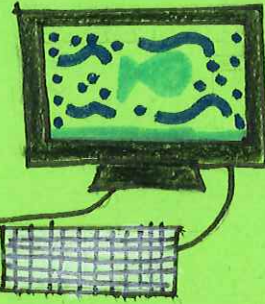

Guys, This is our Earth!

Together we can do it*

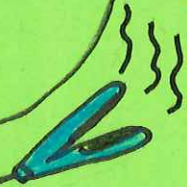

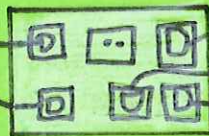

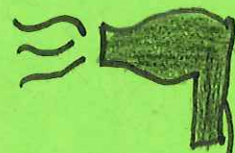

Together we can save the Earth
we can do it for a better world
stand up of the bed!
and recycle more.

You can do little things
for conserving our big planet
and then you can be
every good person.

It's easier than you think
reuse, recycle and reduce
these are the three rules
less electricity you have to use.

Reuse Recycle Reduce

Alba
&
Silvia

The Three R's

There is a voice inside us that says
we can collaborate for a new world

We draw the sky blue.

but the real colour is grey.

Remember the three R's: reuse, recycle and reuse

Millions of people die

because of the pollution

This is our world

it's in our hands

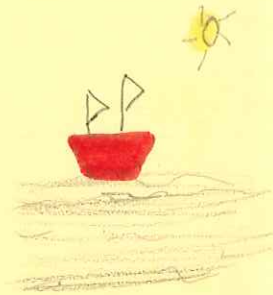

we need to look after it

We can do it all together.

Saving the world

Get a special bulb
For saving energy
and saving the Earth

Pollution shouldn't exist

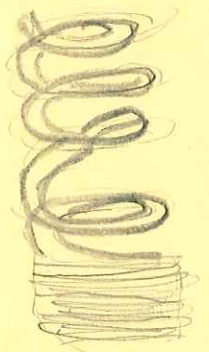

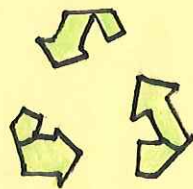

We should reduce, reuse and recycle

Forbid people to smoke

and don't exploit more petrol

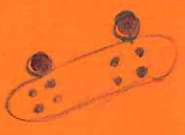

because, all these cause very bad consequences.

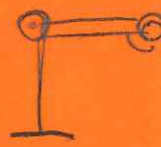

SAVE THE EARTH

The Earth is in our hands

it doesn't matter if we are big or small

We don't know what we are doing

but if we recycle

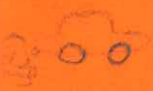

We will get it

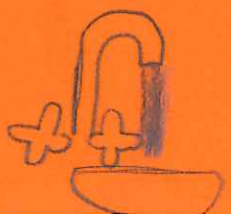

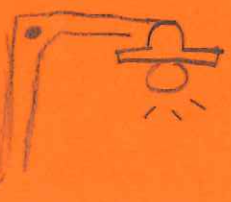

The warm-up overall will arrive

and the North Pole will collapse

Héctor Figueras ; Carlos Bejarano

POEM

Don't pollute,
it's a benefit for people,
if we pollute
Some living beings will die.
it's our fault to pollute.
fish can swim,
in clean water.
DON'T POLLUTE!!!

Irene Rodríguez
María Ruiz y
Raúl Pérez

@ POEM

The Earth
is a very polluted planet,
but,
if it wasn't polluted
it would be more beautiful.
We have to respect
the environment,
and try
not to pollute the Earth.

Look after the forest,
save water,
save electricity,
leave the rubbish in the containers,
and save fuel.

Everyone has to try
to save the environment.

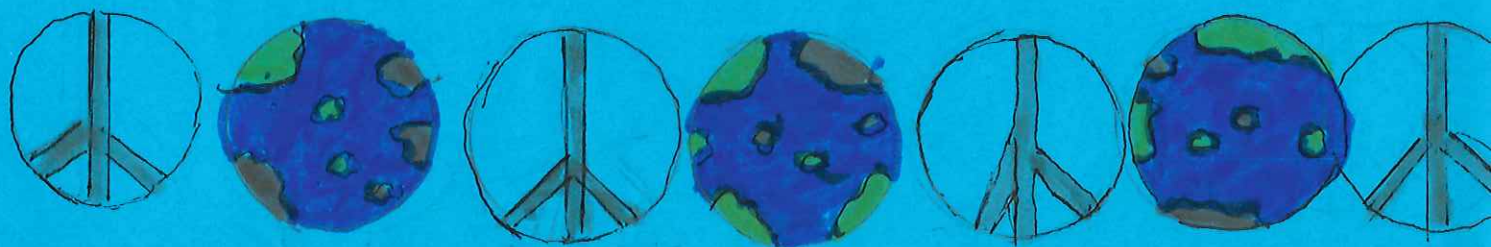

Jordi

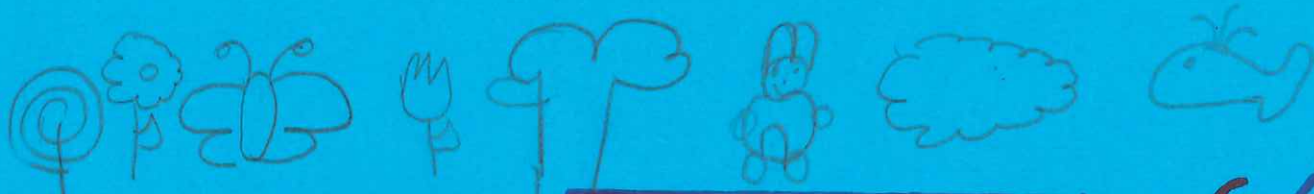

Rubén

WHAT CAN WE DO?

A new world we need
because the pollution is not wanted
Don't use the car
because we need the bicycle
The energy that we waste
is turned into pollution
This world can be better
if we know how not to pollute

The Earth is ours

The Earth
is very
important.

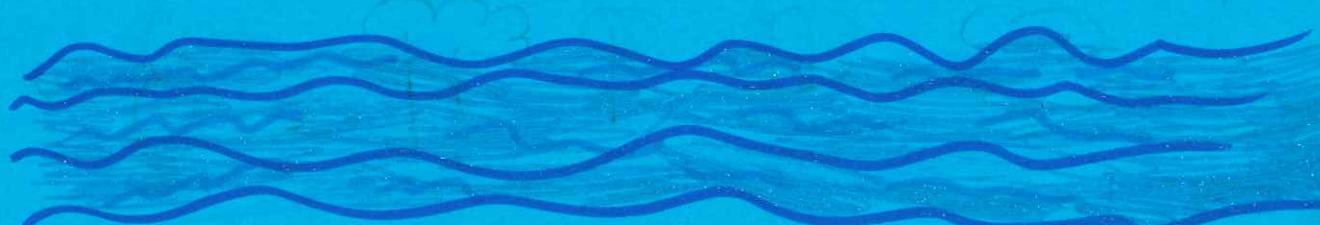

Day and night.
The Earth is ours

The pollution
is bad for
The Earth

We're fortunate
to have it

M^a Carmen
Alamillo

POEM

We take care of the environment
and we will success.

We have to take care of not
causing explosions to wash
the environment.

Sometimes we leave the tap running
and there are people dying of
thirst.

The beautiful flowers do not go
in spring, because we provoke
fires that they do not deserve.
